

Report on activities of the Refraction Study Group

prepared by
Stefan Riepl

- Evaluation of mapping functions by low elevation tracking data (E. Pavlis).
- Evaluation of horizontal gradients (S. Riepl).
- WWW - availability of the refractive index calculation procedure provided by R.Hill (NOAA)
- Adaptation of a better refraction angle model provided by H. Yan in order to improve the low elevation tracking data acquisition.
- RSG-homepage: <http://www.wetzell.ifag.de/publ/rsg/rsg.html>
