

SLR, GNSS, VLBI, and DORIS Networks:

ILRS+IGS+IVS+IDS

C. NOUI/NASA GSFC

- ILRS, IGS, IVS, and IDS networks are the backbone of GGOS
- Co-location important for the ITRF and for validation of results
- Network breakdown: ILRS SLR=42, IGS GNSS=407, IVS VLBI=45, IDS DORIS=58
