

Data Formats and Procedures

Working Group

- Consolidated laser Ranging Data (CRD) Format Status
 - Final (v 1.00) format has been released
 - ILRS community has been informed of implementation schedule (finish by 31 Dec 2009)
 - OCs:
 - HTSI is ready to receive and validate data
 - EDC will be ready to receive data during November
 - DCs:
 - CDDIS and EDC both have CRD normal point archive areas
 - ACs:
 - Several analysis centers will be ready to validate normalpoints by the end of the year
 - Stations:
 - Normal points from 5 (MLRS, Stromlo, Changchun, Shanghai, Wettzell)
 - Full-rate from at least 5 (MLRS, Stromlo, Changchun, RGO, Zimmerwald, FTLRS) in part due to T2L2

Data Formats and Procedures Working Group

- Tracking restrictions
 - Concern that OICETS should implement go/no-go flag
 - Need to survey stations to see which have implemented 3 types of tracking restrictions
 - encourage rest of stations to implement restrictions
- LRO-LR
 - OCs will accept data as for other satellites

Data Formats and Procedures Working Group

- LR-LRO data flow
 - Julie Horwath showed a chart of the data flow (stations, HTSI, CDDIS)
 - the information (CPF, restrictions and data) should be available at CDDIS and EDC for the case of failure at CDDIS and/or EDC
